

## USER EXPERIENCE - DESIGN THINK PROCESS

Presented by: RAGHAVENRA MAHENDRAKAR

Date of Presentation: August 17, 2020

## Agenda

- WHAT IS USER EXPERIENCE (UX)?
- HISTORYOFUX
- WHY USER EXPERIENCE?
- UX DESIGNMETHODS
- WHAT UX DESIGNERS DOES?
- TEKUX DESIGNPROCESS
- HOW WE DELIVERY
- QUESTIONS

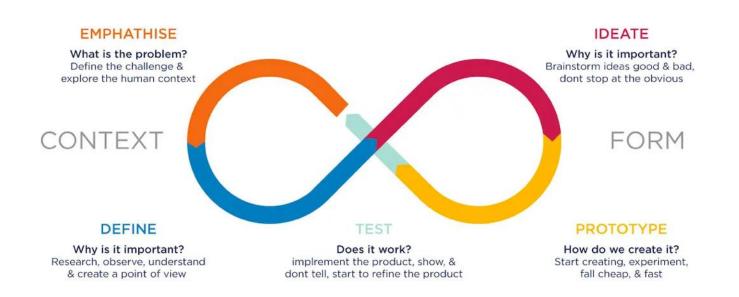

## DESIGN THINKING

## A FRAMEWORK FOR INNOVATION

https://www.youtube.com/watch?v=9BdtGjoIN4E&feature=emb\_title

"User Experience" encompasses all aspects of the end-user's interaction with the company, its services, and its products. **Don Norman** is co-founder and Principal Emeritus of Nielsen Norman Group.

# **Understand the USER**

User experience (UX) focuses on having a deep understanding of users, what they need, what they value, their abilities, and also their limitations. It also takes into account the business goals and objectives of the group managing the project. UX best practices promote improving the quality of the user's interaction with and perceptions of your product and any related services.

Simple & Joyfu

The first requirement for an exemplary user experience is to meet the exact needs of the customer, without fuss or bother. Next comes simplicity and elegance that produce products that are a joy to own, a joy to use. True user experience goes far beyond giving customers what they say they want, or providing checklist features. In order to achieve high-quality user experience in a company's offerings there must be a seamless merging of the services of multiple disciplines, including engineering, marketing, graphical and industrial design, and interface design.

Planning

User experience (UX) is the art of planning a product's design so that interactions with the completed product will be as positive as possible. User experience design addresses all aspects of how a product or service is perceived by users.

## **Experience Valuable**

User experience (UX) is about how a person feels about using a system. User experience highlights the experiential, affective, meaningful and valuable aspects of human-computer interaction (HCI) and product ownership, but it also covers a person's perceptions of the practical aspects such as utility, ease of use and efficiency of the system. User experience is subjective in nature, because it is about an individual's performance, feelings and thoughts about the system. User experience is dynamic, because it changes over time as the circumstances change.

**Human Element** 

User experience (abbreviated as UX) is how a person feels when interfacing with a system. The system could be a website, a web application or desktop software and, in modern contexts, is generally denoted by some form of human-computer interaction (HCI).

## **Emotional Reaction**

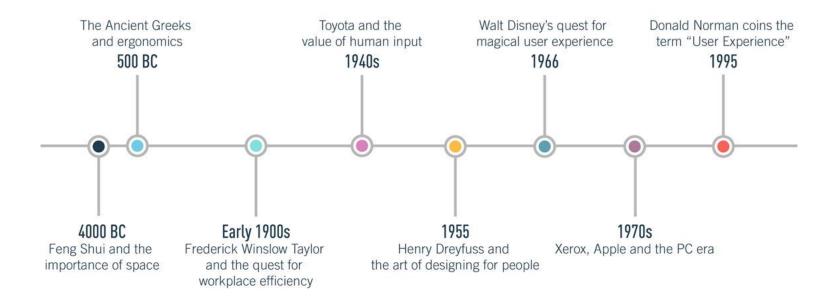

The User Experience is everything that happens to your users when they interact with your business or organization via your website, application or online communications. It includes everything they see, hear and do as well as their emotional reactions.

## HISTORY OF UX

WHY UX?

If we are designing for real users, then humanizing the experience should be our goal.

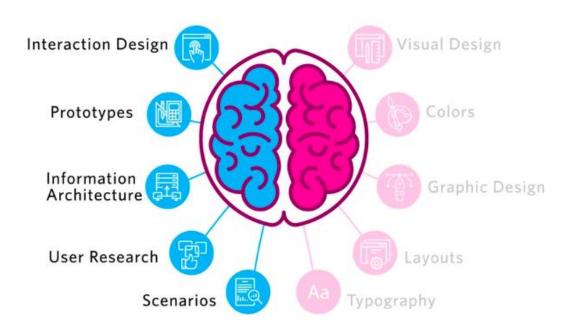

## UX UI

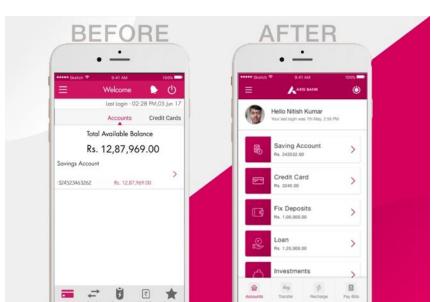

# A REALTIME USER EXPERIENCE

## **BEFORE UX AFTER UX** UI UI UX UX

## **AFTER UX**

## **BEFORE UX**

## **AFTER UX**

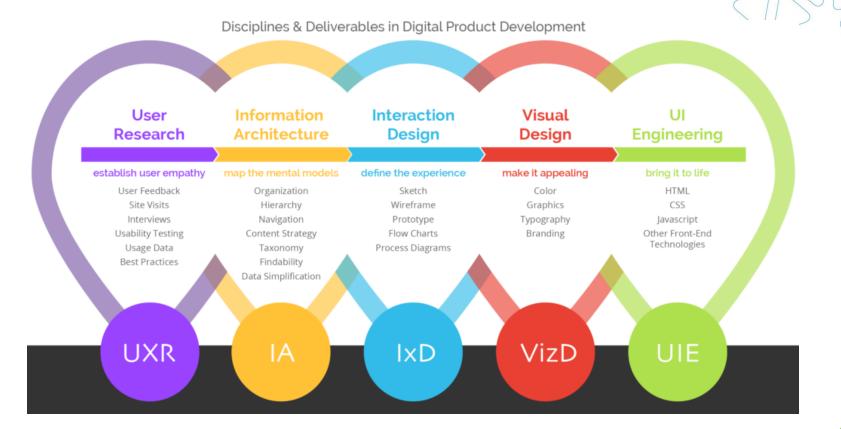

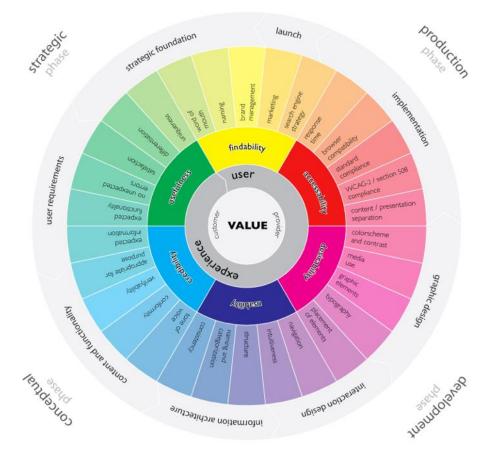

You Are What you Do, NOT What You Say.

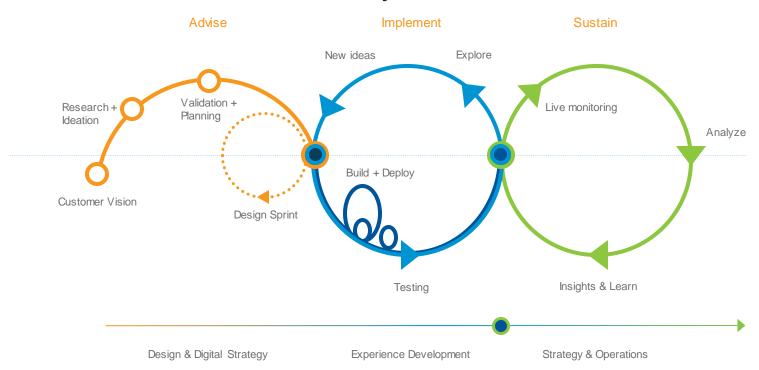

## UX across the Product Lifecycle

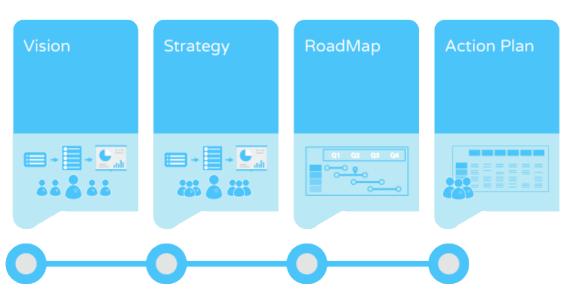

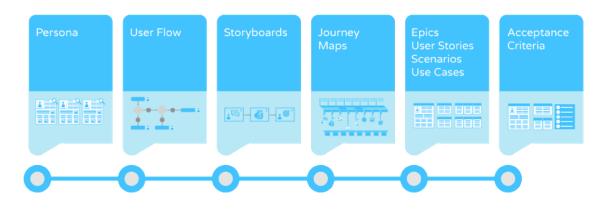

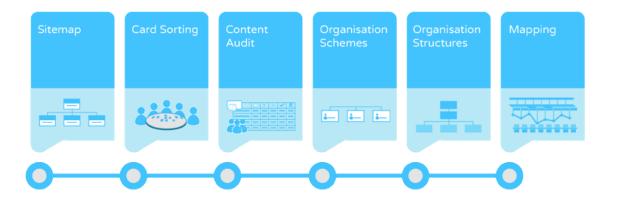

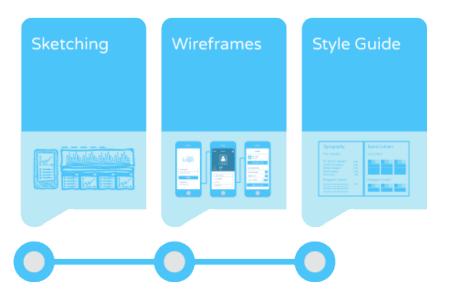

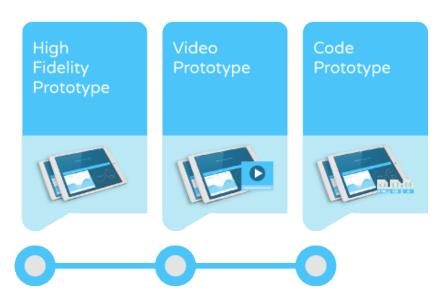

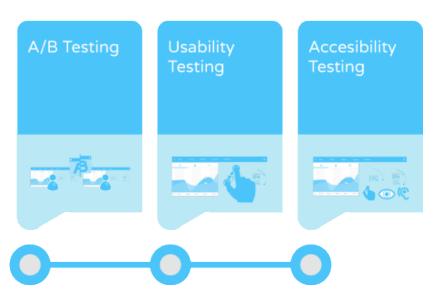

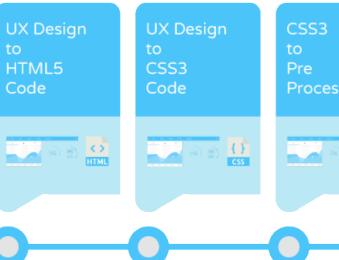

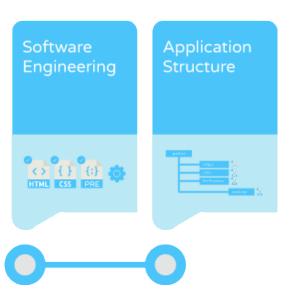

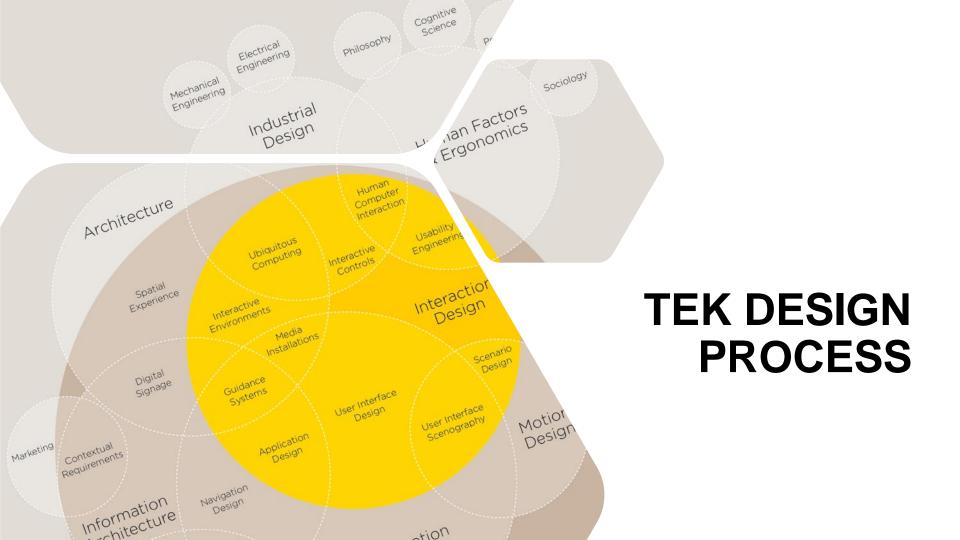

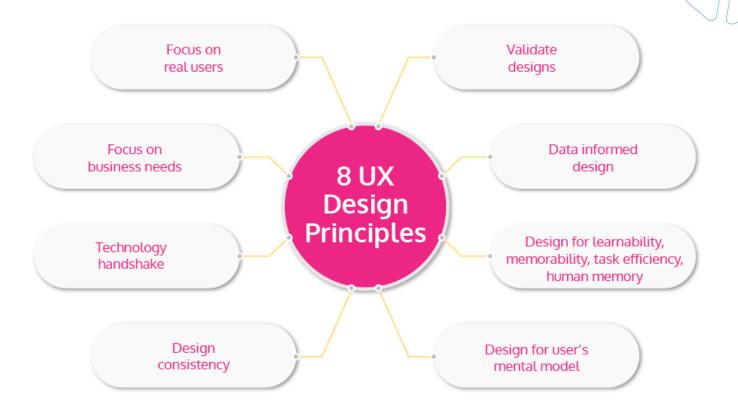

## Digital Services Overview

### Creative & Design

- Graphic design
- Visual design
- Interaction design
- Web design
- Creative studios

# User Experience Development

- UX advisory services
- UX research
- Experience design and prototyping
- Mobile and responsive solutions
- UI modernization
- Website development

### Marketing Technology

- Content management services
- Digital analytics
- Marketing automation
- Campaign/email
- CRM

### Strategy & Operations

- Content strategy and migration
- Information architecture
- Globalization architecture
- Digital business analysis
- Product management

### What We Do

### **User Experience Solutions**

#### **Our Services**

- UX Advisory Services
- Experience design and prototyping
- Mobile and responsive development
- UI modernization
- Web development
- Progressive web apps
- UI and POC studios

### Summary

TEKsystems provides integrated experience design and development for omni-channel solutions. From user experience consulting, to interface concepts and enterprise solution development, TEKsystems understands how to deliver compelling user experiences that support your digital business goals.

#### **Digital Experiences:**

- Pragmatic UX expertise
- Wireframing and concept design
- Site architecture
- Native mobile development
- Responsive design strategy
- Agile delivery
- Integrated UX/UI/Development

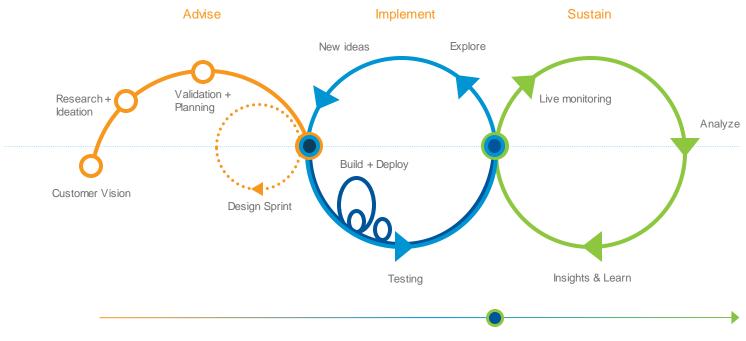

# HOW WE DELIVERY

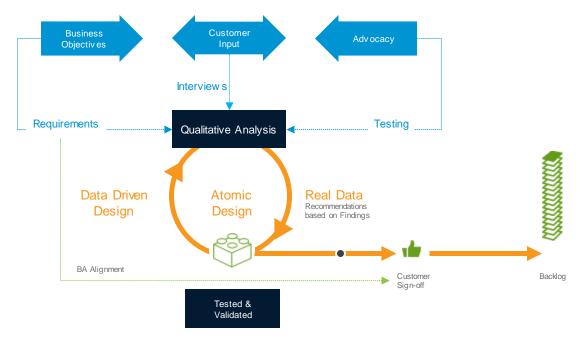

## UX across the Product Lifecycle

### **UX During Initiation**

### Optimized integration for further development

## Construction UX Cycle

#### Sprint behind

Review feedback from stakeholders, UAT, etc. and integrate into upcoming

### Current sprint

- Planning: go over the stories one more time and make sure they pass DOR
- Update specs / reqs
- Conduct desk checks
   (QA) for adherence to
   UX mock-ups and
   reqs
- Support the development team on as-needed basis

#### 1 sprint ahead

- Approvals for requirements and low fidelity mock-ups for the stories
- High fidelity mock-ups design
- Elaborate the stories to DOR
- Create or update
   Style Guides for the development team

#### 2 sprints ahead

- Pick stories for development
- Review/clarify requirements
- Create/update lo-fi UX artifacts from inception

## UX Studio Example

**TEKsystems** Creative Services Manager\*

UX & UI Designers

**UX** Research

### **Daily collaboration**

Client Development Scrum Team

#### Incorporates

#### Outputs & Work Products

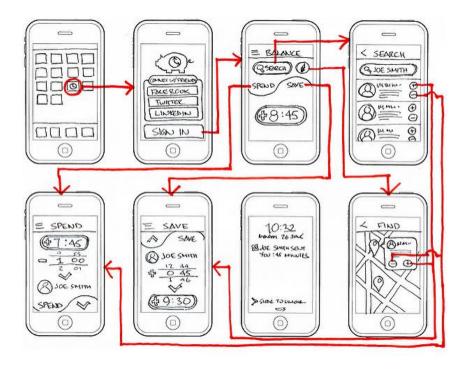

- · Completed design stories
- Demand plan
- Updated Style-guides
  - · Master schedule planning
  - · Resource Capacity Plan
  - · Status and financial report

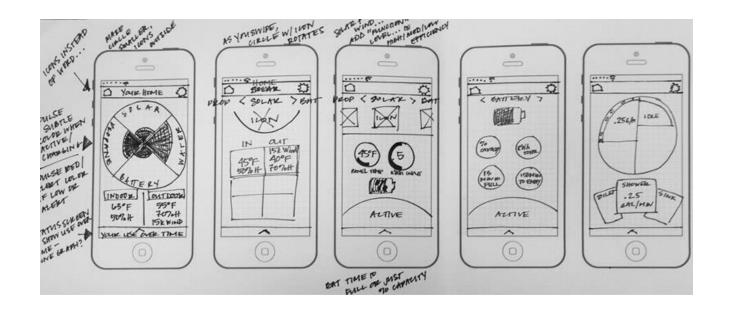

## Wireframe Designing

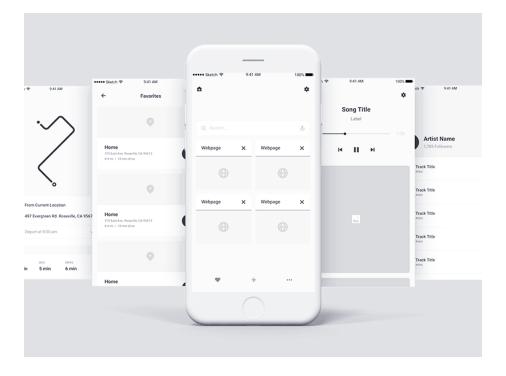

## Wireframe Design

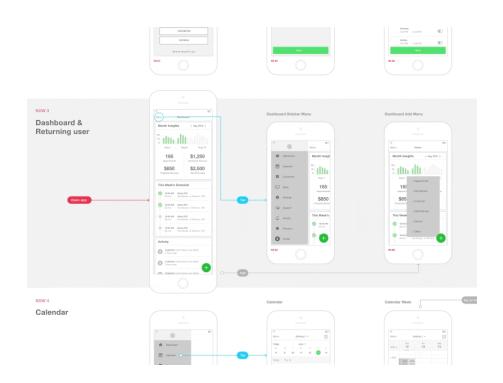

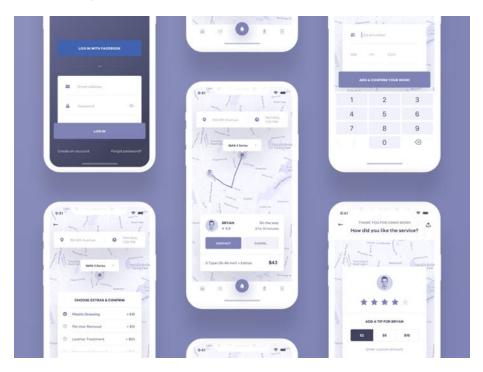

### **UX Flow Process**

## High Fidelity Prototype

# **THANK YOU**
